Kalamazoo, MI-- Humphrey Products has recently acquired “**Medical and Media Isolation Product Lines**” from the Curtiss-Wright Corporation. Specifically, these products include Liquid Isolation (Inert) Valves, Liquid Isolation (Inert) Proportional Valves, and a high resolution Proportional Control Valve Series for air, inert gases and some liquids.

Humphrey is in the process of moving the production lines, inventory and jobs from Nogales, Mexico, back to America and plans to begin marketing these products under the Humphrey brand in the September/October time period.

Founded in 1901, Humphrey Products is a leading producer of pneumatic products, including valves and cylinders, and design and manufacturing of specialty custom Engineered Products. Humphrey’s products are proudly made in the USA and used in a variety of applications in medical, process control, manufacturing automation, transportation, analytical instrumentation, packaging and material handling.
